

Recyclable Presswood Pallet

We design and produce the Recyclable Presswood Pallet for more than 6 years. It is a good alternative for the traditional wood pallet, it can save your budget, stock space and shipping cost by choosing the Recyclable Presswood Pallet. Most of our products are export to European, American, Asian countries and we look for long term partners in all countries in all areas.

Product Introduction

We always work as a tangible team to ensure that we can provide you with the best quality and the best price for Factory Selling China Waste Wood Chips Sawdust Pressed Pallet Molding Making Machine, As an experienced group we also accept tailored orders. The main target of our organization would be to build up a satisfying memory for all clients, and build a long-term win-win organization relationship. Factory Selling China Pallet Machinery, Pallet Production Line, Till now, the goods list has been updated regularly and attracted clients from around the globe. Comprehensive facts is often obtained in our web-site and you'll be served with premium quality consultant service by our after-sale group. They are likely to help you get thorough acknowledge about our merchandise and make a satisfied negotiation. Company go to to our factory in Brazil is also welcome at any time. Hope to obtain your inquiries for any pleased co-operation.

China Recyclable Presswood Pallet Suppliers and Manufacturers

Product Introduction of Recyclable Presswood Pallet

The full name of Recyclable Presswood Pallet is plant fiber molded flat industrial pallet. The raw materials used for the pallet are wood shavings, plant stalks, etc. It is an integral structure, and the panel and 9 supporting feet are molded at one time. The surface of the pallet board is flat and smooth, which can meet the transportation of various goods, and the lower surface is equipped with reinforcing ribs. The horizontal and vertical force of the board is balanced, and the nine-leg distribution can meet the four-way insertion of the forklift. It is a flat four-way fork-in single-sided pallet.

The Advantage of Recyclable Presswood Pallet

- 1 Fumigation Free
- 2 Water-proof
- 3 Eco-friendly, recycled material
- 4 Stacking Packing, saving space
- 5 One-step molding, smooth surface, no nail
- 6 Lightweight while high load capacity
- 7 Four-way Entry
- 8 Competitive price than other pallets

Delivery and Shipping Service of Recyclable Presswood Pallet

The Recyclable Presswood Pallet is wrapped in PET film, it is safe to be shipped by truck, sea and plane. Our Recyclable Presswood Pallet factory is located in Jiaozhou, Qingdao, only one hour drive to the famous Qingdao Port and Qingdao Jiaodong International Airport. It can save the domestic shipping cost and provide fast and convenient delivery. And only 20 minutes' drive to the Jiaodong international airport, welcome to visit our factory.

Faq

Q: Are you trading company or manufacturer?

A: We are professional manufacturer of the Recyclable Presswood Pallet and production line.
And Welcome to visit our factory

Q: How long is your delivery time?

A: Generally we have all sizes in stock, so we can arrange the shipment as soon as possible. If in peak season 5-15 days with large quantity

Q: Do you provide samples? is it free?

A: Yes, we could offer the sample for free charge, clients only needs to pay the freight.

Q: What is your terms of payment?

A: T/T or L/C

Q: How many sizes available for Recyclable Presswood Pallet

A: We have seven size mold and has some customized molds

Q: Can you do the OEM Size and pattern for Recyclable Presswood Pallet

A: Yes, with certain quantity, we can make the new mold and produce any size and pattern.

Q: Can we order mixed size of the pallet

A: Yes, we have all sizes in stock and you can have mixed order.

Q: How many pallets can be loaded in one container

A: Because of the nestable design, 1000-1500 pcs Recyclable Presswood Pallets can be loaded

How to make the Recyclable Presswood Pallet

First the wasted wood was put into the chipping machine and chip it to fine wood chips. The fine wood chips are dried by a dryer, then mixed with thermosetting resin, and placed in a press for compression molding. The entire production process is carried out under high temperature and high pressure to kill any insects and fungi remaining in the wood. At the same time, due to the high density of the wood products produced, it can prevent any other insects from reproducing and re-invading. This kind of molded product is "artificial wooden packaging material" instead of the traditional "solid wood packaging material". Its products no longer need to be treated with insects, and there are no live insects in the products. It meets ISPM15 (International Standard for Phytosanitary Measures 15). The demand for exporting wood packaging products, and after various service life cycle fatigue tests, can be shipped with the goods to other countries without any special treatment.
